

WarpSpeed Taxi Inc (WRPT) Corporate Update

NAIROBI, KENYA – January 18, 2023– WarpSpeed Taxi Inc. (OTC: WRPT) (“WarpSpeed” or the “Company”), the developer and U.S. exclusive license holder of an all-in-one software solution for ride hailing, food delivery, and courier services, is pleased to its shareholders with the following update.

The Company has completed the development and beta testing of its WarpSpeed Taxi software and is ready to launch this app in the United States. In order to fund the application launch, the Company intends to complete an offering of its common stock in reliance on Regulation A.

The Company is pleased to announce that it is also going to commence the development of commercial software that it will employ in order to establish distribution centers in rural areas around the world.

A large percentage of the world population lives in rural area in non-Western countries where most consumers purchase good through local shops. Local shop owners have traditionally purchased their inventory from wholesalers located in the nearby major city. Using an automated inventory and product delivery system that it develops in-house, WarpSpeed intends to provide rural businesses with an alternative means of accessing consumer goods that it hopes will be more efficient and cost-effective than existing supply chain options.

This new project, which WarpSpeed intends to brand as Pinnacle DSB (pinnacledsb.com), will include the creation of a large distribution center in a major city. The local shop owners will be provided with a locked tablet in order to access real-time inventory data to place purchase orders at competitive prices. Logistics will be implemented for a weekly delivery system to deliver ordered products.

WarpSpeed Taxi has commissioned a detailed business plan, which it expects to post online within two weeks.

Daniel Okelo, WarpSpeed’s President and C.E.O., says “while we raise the necessary funds to launch WarpSpeed Taxi in the USA, we can start the Pinnacle DSB project that is a unique business model with a very significant potential to provide product distribution to a large market that has been ignored.”

About WarpSpeed Taxi

WarpSpeed Taxi Inc. is a company that has developed a ride-hailing and food delivery computer and mobile device application known as “WarpSpeedTaxi USA” that will provide consumers with

convenient door-to-door transport that leverages smart mobility platforms to connect drivers with passengers and lets drivers use their personal vehicles.
